## 1. The Original

Fastnet Rock, or simply Fastnet (possibly from Old Norse Hvasstann-ey, meaning "sharp-tooth isle"; called Carraig Aonair, meaning "lonely rock", in Irish) is a small islet in the Atlantic Ocean and the most southerly point of Ireland. It lies 6.5 kilometres (4.0 mi) southwest of Cape Clear Island and 13 kilometres (8.1 mi) from County Cork on the Irish mainland. Due to its location, Fastnet is known as "Ireland's Teardrop", because it was the last part of Ireland that 19th century Irish emigrants saw as they sailed to North America.

Fastnet Rock is a small clay-slate islet with quartz veins. It rises to about 30 metres (98 ft) above low water mark and is separated from the much smaller southern Little Fastnet by a 10 metres (33 ft) wide channel. Fastnet also gives its name to the sea area used by the Shipping Forecasts on BBC's Radio 4. The current lighthouse is the second to be built on the rock and is the highest in Ireland.

### 5. Recommended settings

To visualize all light effects, HDR should be activated. The higher the settings for "texture resolution" and "airport detail" the better the quality of the scenery but the more affect on the FPS ratio.

### 6. Required Software

X-Plane® Version 11.11+, 10.45+ or 9.7
