## 2. The Scenery

The scenery is based on open public information and maps. The objects were completely rebuilt.

The package includes night textures and realistic lighting (X-Plane 10, 11 only).

The scenery pack was designed as an addition to the AXDG scenery LOAN / LOAW Wr. Neusadt Ost (Link: : <http://www.x-plane.at/drupal/node/301>) but can also be used as a stand alone scenery.

### Charts

The helipad is located near the LOAN airport and can be found on the charts included in the above mentioned package.

Nevertheless a VFR approach/departure chart was made by the author using real life vectors.

## 3. Functions (summary)

### 5. Recommended settings

To visualize all light effects, HDR should be activated. The higher the settings for "texture resolution" and "airport detail" the better the quality of the scenery but the more affect on the FPS ratio.

### 6. Required Software

X-Plane® Version 11.10+, 10.30+ oder 9.7

### 7. Comments for X-Plane 9 version

Unfortunately some functions of the scenery must be disabled for X-Plane 9 and therefore it will not look like on the pictures which where taken with X-Plane 10.30

### 8. Used Libraries

none

### 9. Recommended addons

Although the scenery will work without any addons, we recommend to use the following ones for the whole experience (pictures taken with addons installed):

#### **AXDG scenerypack LOAN / LOAW Wr. Neustadt Ost**

Download from: <http://www.x-plane.at/drupal/node/301>

#### **OSM\_Europe\_osm+autogen by PilotBalu,**

Download from: [http://simheaven.com/?page\\_id=23](http://simheaven.com/?page_id=23)

to have streets and buildings from OSM and autogen where is no coverage of such data.

#### **Europe\_Library fromLyAvain,**

Download from: [http://simheaven.com/?page\\_id=14](http://simheaven.com/?page_id=14)

to see European instead of US buildings.
