1. The Original

The airfield Trieben (LOGI) is certainly one of the best starting points for distance flights in the Eastern Alps. Above all, the haul flights always made with more than 12 hours flight time and many flights over 1000km This has been impressively demonstrated. 760m asphalt track allow for a smooth flight operation.

5. Recommended settings

To visualize all light effects, HDR should be activated. The higher the settings for "texture resolution" and "airport detail" the better the quality of the scenery but the more affect on the FPS ratio.

"runways follow terrain contours" has to be OFF!

6. Required Software

X-Plane® Version 10.30+ or 9.7

7. Used Libraries

none

8. Recommended addons

Although the scenery will work without any addons, we recommend to use the following ones for the whole experience (pictures taken with addons installed):
