Austrian X-Plane Design Group

The Original

The Civil Aerodrome Niederöblarn is located in Niederöblarn, about 30 kilometers east of Schladming, Styria. Operator of the airport is the Sport Union Austria. The airport has an asphalt runway with 730 meters length. The airfield is home of several flying clubs and schools.

The airport is also a starting point for route glider flights.

Since 2001, there is also a heliport located on the site of the airport (ICAO code: LOGC). It is base to the crew of the Christophorus 14 rescue helicopter. This helibase was also used for the TV series "Die Bergretter" which tells the storie of a helicopter rescue crew in the mountain area.

Also a club hotel with a sport center, which is also operated by the Sport Union Austria, is directly located at this airport.

Our airfield LOGO

Niederöblarn - the gateway to the Alpine race track. The infrastructure of the Alps flight school offers a wide range of possibilities. From the basic school up to performance flights.

Niederöblarn, a small Styrian village situated in the heart of Austria at the base of the mountain 'Grimming', is the location of the 'Club Sport Union Alps Flight Center' with its airport "LOGO". Here everyone has the opportunity to fulfill his dream of flying. Whether gliding, sailing aerobatics, motor sailing or motor flights, everything can be learned here and later exercised.

In just three weeks, you will learn to operate a glider and after that you will be able to take controls of a glider airplane. Here you will learn how to slide through so-called "beards", which are important for soaring thermals or taking advantage of the sloping updraft from one peak to another. All at a very attractive price.

If you want to give your life wings you can do this as early as 15 years in a glider training. Or do you like "Power" under the hood? You can start your pilot career as a student motor pilot. For those who just need 'more' it is possible to board a glider in the sky "gymnastics", ie to experience aerobatic maneuvers very close.

Do you want to experience the natural bird's eye view hassle free? No Problem! Why not take a scenic flight to the most beautiful places in Austria. You can do this in a glider or motor plane to the Dachstein, Grossglockner, Salzkammergut, the Xeis or to a destination of your choice.

LOGC Christophorus 14

From 1986 to end of June 2001 a rescue helicopter from the Austrian Army – 'Christoph' was based here.

After 15 years in which the armed forces pilots flown between 500 and 800 emergency helicopter missions per year on July 1, 2001 their assignment ended.

The Christophorus Flight Rescue Service (operated by ÖAMTC) with the helicopter Christopher 14 took over the emergency helicopter service for the Enns Valley as part of an assistance contract with the Ministry of the Interior.

In 2002 the base of Christopher 14 in Niederöblarn was modernized

The scenery

The scene is based on publicly available information and pictures. All items have been re-created on the basis of photos from <http://www.wildbergair.com/>, Pictures of the FBL/ FL Hr. Sebacher and Photos, made by our user hafri44, Hans.

The scenery includes night textures and realistic lighting (Only X-Plane 10).

Charts
included

Austrian X-Plane Design Group

Functions (summary)

- Photorealistic Scenery
- Compatibel to OSM+autogen V6.0 from PliotBalu
- Realistic Groundtextures at he airport
- Parkpositions, Taxiways, Runways, ... conform to the Charts
- realistic Markings at the apron and the taxiways
- various buildings and structures in the area
- nighttextures
- Winter - Textures
- Christophorus 14 location with automatic hangar-door :-)
- realistic lighting *)
- ATC-Taxilines for AI-Traffic *)

*) X-Plane 10 only!

Installation

Just copy the folder "LOGO Niederoeblarn 1.0" " in the compressed file after unpacking in the "Custom Scenery" - folder.

directory structure:

```
<X-Plane-Verzeichnis>/  
    Custom Scenery /  
        LOGO Niederoeblarn 1.0 /  
            Earth nav data and others)
```

and restart X-Plane.

Austrian X-Plane Design Group

Recommended settings

To visualize all light effects, HDR should be activated. The higher the settings for "texture resolution" and "airport detail" the better the quality of the scenery but the more affect on the FPS ratio.

"runways follow terrain contours" has to be OFF!

Required Software

X-Plane® Version 10.30+ or 9.7

Used Libraries

none

Recommended addons

Although the scenery will work without any addons, we recommend to use the following ones for the whole experience (pictures taken with addons installed):

OSM Europe osm+autogen by PilotBalu,

Download: http://simheaven.com/?page_id=23

to have streets and buildings from OSM and autogen where is no coverage of such data.

or

Osm Austria beta6.0 by PilotBalu

Download: <http://simheaven.com/experimental/>

HD Mesh Scenery v2 by alpilotx

Download: <http://www.alpilotx.net/downloads/x-plane-10-hd-scenery-mesh-v2/>

Europe Library von LyAvain,

Download: http://simheaven.com/?page_id=14

to see European instead of US buildings.
