Timmersdorf is a particularly well-known, by Alpine Sport Aviator Club Leoben powered airfield with ideal conditions is for the sport of soaring. The airport is one of the few Austrian courts, from which already Flights over 1000 miles and other record flights were launched successfully.

The special geographical conditions, such as wide valleys with good outdoor landing facilities and single detached mountains, make it easy even novice pilots to get used to flying in the mountains. Also considered as special feature that can be flown in Timmersdorf to almost all seasons "wave". Immediately after passage of cold fronts from the northwest are formed at the surrounding mountains often even at low wind speeds, waves can occasionally even in the middle of summer so bring, "diamond heights", a height gain of at least 5000 m.
