Austrian X-Plane Design Group

1. The original

The establishment of the SVA on 21 November 1953 was the launch of extensive construction activity. In 1955, the members have created the conditions for approval as a glider landing area by expending more than 7,000 volunteer hours. The inauguration of the airfield took place on 17 June 1956th

End of the fifties, the expansion of the airfield and the construction of various buildings was made possible thanks to a generous sponsorship by the domestic industry.

ICAO Code:	LOIR
Height:	2803ft / 855m MSL
Movement areas:	640 x 30m Grass (plus 96m Stop-area RWY 23)
Runway heading:	043,5° / 223,5° (05 / 23)
Safety strip:	796 x 60m; runs along the tow path
Winch track:	860m asphalt, runs along the safety strip
Start types:	Winch-start / F-towing only on 23
Frequency:	122,40 MHz
Call:	- "Reutte Segelflug" (Sailplanes)
	- "Reutte Flugplatz" (Motorplanes)

2. The Scenery

The Scenery is based on the XP8.50-Scenery from Gerd Lichtenthäler and Jürgen Lechleitner at <http://www.flightport.de>:

Preface

I got a request from Jürgen Lech Leitner, who has the small airfield Reutte beautifully realized for MS Flight Simulator early 2008. Jürgen had already received some requests for X-Plane implementation of the place and asked for assistance. I am pleased that the space is also available for X-Plane through the collaboration of Gerd Lichtenthäler and Jürgen Lech Leitner and the scenery now can be downloaded from Flight Port.

The Szenerie

Reutte (Loir) is a small airport in Tyrol in western Austria. The course was originally implemented by Jürgen Lech Leitner for FS2004 and later adapted for FSX. Both versions previously available at Avsim and now also with Flight Port.

The scenery includes night textures and realistic lighting (Only X-Plane 10).

Charts

included

Austrian X-Plane Design Group

3. Functions (summary)

- Photorealistic Scenery
- Compatibel to OSM+autogen V6.0 from PilotBalu
- Realistic Groundtextures at he airport
- Parkpositions, Taxiways, Runways, ... conform to the Charts
- realistic Markings at the apron and the taxiways
- various buildings and structures in the area
- nighttextures
- Winter - Textures
- realistic lighting *)
- ATC-Taxilines for AI-Traffic *)

*) nur X-Plane 10!

4. Installation

Just copy the folder "LOIR_Reutte-Hoefen 1.0 in the compressed file after unpacking in the "Custom Scenery" - folder.

directory structure:

```
<X-Plane-Verzeichnis>/  
    Custom Scenery /  
        LOIR_Reutte-Hoefen 1.0 /  
            Earth nav data and others)
```

and restart X-Plane.

5. Recommended settings

To visualize all light effects, HDR should be activated. The higher the settings for "texture resolution" and "airport detail" the better the quality of the scenery but the more affect on the FPS ratio.

"runways follow terrain contours" has to be OFF!

Austrian X-Plane Design Group

6. Required Software

X-Plane® Version 10.30+ or 9.7

7. Used Libraries

none

8. Recommended addons

Although the scenery will work without any addons, we recommend to use the following ones for the whole experience (pictures taken with addons installed):

OSM Europe osm+autogen by PilotBalu,

Download: http://simheaven.com/?page_id=23

to have streets and buildings from OSM and autogen where is no coverage of such data.

or

Osm Austria beta6.0 by PilotBalu

Download: <http://simheaven.com/experimental/>

HD Mesh Scenery v2 by alpilotx

Download: <http://www.alpilotx.net/downloads/x-plane-10-hd-scenery-mesh-v2/>

Europe Library von LyAvain,

Download: http://simheaven.com/?page_id=14

to see European instead of US buildings.
